Interview Questions: Stacks and Queues (ungraded)

Practice Quiz, 3 questions

Next Item

1/1 point

1

Queue with two stacks. Implement a queue with two stacks so that each queue operations takes a constant amortized number of stack operations.

Note: these interview questions are ungraded and purely for your own enrichment. To get a hint, submit a solution.

I dont know	

Your answer cannot be more than 10000 characters.

Thank you for your response.

Hint: If you push elements onto a stack and then pop them all, they appear in reverse order. If you repeat this process, they're now back in order.

1/1 point

2

Stack with max. Create a data structure that efficiently supports the stack operations (push and pop) and also a return-the-maximum operation. Assume the elements are real numbers so that you can compare them.
